Reference : Our experience with Contek and its software

Dear Sebastien :

I would like to thank the Contek team for its dedication and support. I've especially appreciated the diligence and professionalism of your technical/sale force.

Your software has given us a tremendous advantage in managing our quality control. Under your guidance, we have had the added benefit of gaining knowledge on cement and on our production process: having been in business since 1956, I would say that this, in itself, is an eye-opening accomplishment.

Once again, I would like to express my sincere gratitude, and look forward to the next generation of the Contek software.

Best regards,

Mrs. Raphaëlle Chapuis, P.Eng.
Technical Manager
