seeMIX III Workshop

Our seeMIX III workshop will not only help you understand concrete better, it will help you learn how to take full advantage of the technology behind it.

seeMIX III Technology focuses on :

- Optimizing Concrete Mixtures
- Producing Submittals
- Preventing Problems
- Improving your cement efficiency

Training Course on seeMIX III

Our two day, hands-on training course will take place June 2008, in Colorado at a hotel in close proximity to the airport.

The training session will focus on 4 major points:

- Using the software, from basic setup through advanced concepts
- The 10 most valuable reports you can generate from seeMIX III
- Implementing the software in your day to day operation
- Concrete troubleshooting using seeMIX III

"Attending this class will qualify you for PDHs. Contek will provide a certificate of attendance stating qualifying PDH hours."
